Zeu Capua Fullstack Web Developer. Educator.

Programmer with a focus on education and creating content to make development easier and accessible.

Projects —

Lophop February 2023 - July 2023
- Creating a fullstack all-in-one online application designed to assist coding teachers, with SvelteKit and Prisma
- Developed working authentication with open source Authorizer; working to implement more features

Progressive Victory July 2022 - January 2023
- Designated frontend developer for the organization's website, progressivevictory.win, implementing user interface designs to showcase information about volunteer efforts and candidates' campaigns throughout the United States
- Developing with web technologies such as React, Next.js framework, Storybook unit testing, Github version control, Airtable API integration
- Coordinating between political organizers, backend developers, and designers for implementation of UX/UI and set MVP goals

thoughts.zeu.dev March 2023 -
- Written blogs and tutorials about web development that explains technology in a succinct and understandable manner

Trace & Typew February 2023
- Released Svelte packages available on NPM; line by line highlighter and intuitive typewriter components

Work Experience —

Eraser.io August 2023
- Created sponsored content to showcase and advertise their AI program DiagramGPT in video for social media, owning the process from concept to content to editing.

South Pasadena Educational Foundation June 2019 -
- Summer school classes taught based on the subjects below with an average of 20 students each who are in elementary and middle school ranging from 1st to 8th grade both in person and online through Zoom.
- Developed curriculums ranged from coding fundamentals using Scratch to introduction of electronics with Raspberry Pi GPIO pins in a Piper Kit.

The Artopath January 2023 - March 2023
- Developed and designed for Los Angeles based artist Sebastian Lopez, made with Svelte and TailwindCSS

theCoderSchool Pasadena August 2021 - June 2022
- Taught students coding fundamentals, either in a 1 to 1 or small class setting, including at the private Wesley School, in various languages (Python, Scratch, etc.) with curated lessons to suit their strengths and interests.
