Zeu Capua. Fullstack Web Developer. Educator.

Programmer with a focus on education and creating content to make development easier and accessible.

Projects —

The Artopath January 2023 -

- Developed and designed for Los Angeles based artist Sebastian Lopez, made with Svelte and TailwindCSS

Lophop February 2023 -

- Creating a fullstack all-in-one online application designed to assist coding teachers, with SvelteKit and Prisma
- Developed working authentication with open source Authorizer; working to implement more features

Progressive Victory July 2022 - January 2023

- Designated frontend developer for the organization's website, progressivevictory.win, implementing user interface designs to showcase information about volunteer efforts and candidates' campaigns throughout the United States
- Developing with web technologies such as React, Next.js framework, Storybook unit testing, Github version control, Airtable API integration
- Coordinating between political organizers, backend developers, and designers for implementation of UX/UI and set MVP goals

Mall - Svelte December 2022 - March 2023

- Developed a fullstack Stripe test storefront using SvelteKit using local storage

Gumfresh December 2022

- Developed a Gumroad storefront created on the edge using Deno and its full stack framework Fresh

Trace & Typew February 2023

- Released Svelte packages available on NPM; line by line highlighter and intuitive typewriter components

Experiences —

South Pasadena Educational Foundation June 2019 -

- Summer school classes taught based on the subjects below with an average of 20 students each who are in elementary and middle school ranging from 1st to 8th grade both in person and online through Zoom.
- Developed curriculums ranged from coding fundamentals using Scratch to introduction of electronics with Raspberry Pi GPIO pins in a Piper Kit.

theCoderSchool Pasadena August 2021 - June 2022

- Taught students coding fundamentals, either in a 1 to 1 or small class setting, including at the private Wesley School, in various languages (Python, Scratch, etc.) with curated lessons to suit their strengths and interests.
